As I do not have a feel for how many cases/sets of data this request involves, please starting from the first of the month (May 2011 and May 2012) pull together the data to provide the CO of each analytical parameter at least two data sets to look at for each of these two time periods. If that means just the first week of the month....ok.... or it might take the entire month. The same for micro. Obviously there will not be data for organics and off the top I don't recall if the interim for the Seal methods was yet in place. Regarding your specific question of customer reports and submission forms for the same sets of samples those definitely would be needed and appreciated. Thanks folks, JoeS

Joe

Do you need me to gather the customer analysis report and sample submission forms also?

GregY and TomO: As per the presurvey I am asking that you collect results of compliance SDWA analyses (chem + micro) for May 2012 and May 2011 for review by the team when they are on-site.

OASQA COs: I will be out next week so if you find you need a document etc. per the presurvey material on I: please do email GregY and or TomO directly and just copy GeorgeL and me.
Thanks folks, JoeS
